

Party Poopers!

Don't take the life out of the party.

Hurricane Parties are typically held by people who live along the Gulf Coast who cannot or choose not to evacuate.

Hosts may also lack hurricane supplies, large parties can spread supplies thin..

Drinking should always be avoided. Alcohol can pose danger when an emergency situation occurs.

Electricity may be out for days or even weeks. Do not use a charcoal grill in the house or garage. this can lead to carbon monoxide (CO) poisoning

Do not go joy/thrill walking or driving in a storm. Flooding and flying debris could force emergency management folks to pull away from other duties.

Remember when told to evacuate, **LEAVE.** It could save your life.
