

Water Pressure Changes Coming Soon

## HOW CAN I FIND OUT IF THERE'S A LEAK AT MY HOUSE?

First, turn off all faucets and  
water-consuming appliances.

---

Then, find your water meter  
and read the dial.

---

After 20 minutes, if numbers on the meter  
have changed while no water was used,  
you may have a leak and should contact  
a certified plumber.
